Profile

Mechanical and Aerospace Engineering student with hands on research experience in non-Newtonian jet impingement. Strong background in fluid mechanics, computational methods, aerospace design, and industry experience at Tesla and the Canadian Space Agency.

Professional Experience

Research Student 2025/05 – 2025/08
University of British Columbia Vancouver, Canada

- Worked with Dr. Sheldon Green to reasearch the fluid dynamics of liquid jet impingement onto a moving surface for Non-Newtonian fluids.
- Responsible for fixing test apparatus, running experiments, data analysis, and presenting results.

Manufacturing Engineering Intern 2025/01 – 2025/05
Tesla Reno, USA

- Designed and facilitated installation of safety fixtures and hardware for newly built manufacturing line at Gigafactory 1.
- Collaborated with vendors to purchase and procure components.

Advanced Fuselage Lead 2022/08 – 2025/05
UBC SAE Aerodesign Student Team Vancouver, Canada

- Lead of the Advanced Fuselage subteam of 10 people for UBC Aerodesign to compete in the SAE Aerodesign competition.
- Lead fuselage design using CAD software and computational analysis.
- Manufacturing plane components using composite laying, 3D printing, sheet metal and carbon fiber waterjet cutting, wood laser cutting, and aluminum machining.

Project Management Intern 2024/05 – 2024/08
Canadian Space Agency Longueuil, Canada

- Contributed to the Project Management Team for the Canadarm3 for the NASA led Lunar Gateway space station, in collaboration with international space agencies and commisioned to MDA Space.
- Enhanced project efficiency by managing large datasets for finance and document management using PowerBI, Power Query, and Excel VBA.
- Winner of Intern poster competition among ~20 teams

Project Coordinator 2023/05 – 2023/12
Modern Niagara Vancouver, Canada

- Collaborated with engineering management and trades to assist on the New St Paul's Hospital construction project with issues relating to project progress, budget, data analysis, and scheduling.
- Developed an interactive PowerBI dashboard to track installation progress throughout the entire building.

Education

B.A.Sc in Mechanical Engineering w/ Aerospace Option — 2022/09 – 2026/05
University of British Columbia — Vancouver, Canada
90.5% Cumulative Average
with Distinction, Dean's Scholar, CSME Gold Medal

Engineering Certificate — 2021/09 – 2022/05
Capilano University — North Vancouver, Canada
4.28 GPA
Dean's List

Projects

Lunar Rover Ski Braking System Capstone Project — 2025/08 – 2026/04
University of British Columbia, in collaboration with the Canadian Space Agency
- Led a team of 5 Mechanical Engineering students to develop and build a ski braking system for the CSA's CRATER Lunar Rover.

Titan Endurance Project — 2023/01 – 2023/04
UBC
- Led a team of 6 people to build a launcher and buggy system for MECH 223 project course with strict budget and schedule.
- Incorporated an Arduino, an accelerometer, a servo, as well as various mechanical components to achieve the task of launching a payload towards a designated target while in motion.
- Made MATLAB simulations to optimize payload speed and trajectory to achieve accurate projectile motion and maximum scoring.

Atmospheric Monitoring — 2022/01 – 2022/05
Capilano University
- Led a team to develop a wireless, drone mounted air quality monitoring system to monitor various air quality parameters and stream telemetry to ground receiver.
- Responsible for designing and assembling structure, wiring electrical sensor system, and integrating wireless transceivers with an Arduino to send wireless data with <1% data loss.

Skills

Mechanical Design
- *Machining*
- *3D Printing*
- *Waterjet, Laser Cutting*
- *Composite Manufacturing*
- *Engineering Drawings*
- *DFM/DFA*

Software
- *AutoCAD, Solidworks*
- FEA, CFD
- *Excel, VBA, VBScripts*
- *PowerBI, Power Query*
- *C, C#, C++, Python, MATLAB*
- ANSYS Fluent, ABAQUS
- OpenFOAM

Project Management
- *Scheduling*
- *Budget Estimating*
- *Documentation*
- *Report Writing*
- *HVAC & Plumbing Systems*

Certificates

- BC Class 5 License
- Solidworks CSWA
- Reliability Status Security Clearance
- Basic Operations Drone License
