Profile

Mechanical and Aerospace Engineering student with research experience in non-Newtonian jet impingement and current research in combustion simulation. Strong background in fluid mechanics, computational methods, aerospace design, and industry experience at Tesla and the Canadian Space Agency.

Professional Experience

Research Student

2025/05 – 2025/08

University of British Columbia

Vancouver, Canada

- Worked with Dr. Sheldon Green to research the fluid dynamics of liquid jet impingement onto a moving surface for Non-Newtonian fluids.
- Responsible for fixing test apparatus, running experiments, data analysis, and presenting results.

Manufacturing Engineering Intern

2025/01 – 2025/05

Tesla

Reno, USA

- Designed and facilitated installation of safety fixtures and hardware for newly built manufacturing line at Gigafactory 1.
- Collaborated with vendors to purchase and procure components.

Advanced Fuselage Lead

2022/08 – 2025/05

UBC SAE Aerodesign Student Team

Vancouver, Canada

- Lead of the Advanced Fuselage subteam of 10 people for UBC Aerodesign to compete in the SAE Aerodesign competition.
- Lead fuselage design using CAD software and computational analysis.
- Manufacturing plane components using composite laying, 3D printing, sheet metal and carbon fiber waterjet cutting, wood laser cutting, and aluminum machining.

Project Management Intern

2024/05 – 2024/08

Canadian Space Agency

Longueuil, Canada

- Contributed to the Project Management Team for the Canadarm3 for the NASA led Lunar Gateway space station, in collaboration with international space agencies and commissioned to MDA Space.
- Enhanced project efficiency by managing large datasets for finance and document management using PowerBI, Power Query, and Excel VBA.
- Winner of Intern poster competition among ~20 teams

Project Coordinator

2023/05 – 2023/12

Modern Niagara

Vancouver, Canada

- Collaborated with engineering management and trades to assist on the New St Paul's Hospital construction project with issues relating to project progress, budget, data analysis, and scheduling.
- Developed an interactive PowerBI dashboard to track installation progress throughout the entire building.

Education

M.A.Sc in Mechanical Engineering <i>University of British Columbia, Combustion Simulation Lab</i> Research focus in reacting flow simulation	2026/09 – Present Vancouver, Canada
B.A.Sc in Mechanical Engineering w/ Aerospace Option <i>University of British Columbia</i> 90.5% Cumulative Average with Distinction, Dean's Scholar, CSME Gold Medal	2022/09 – 2026/05 Vancouver, Canada
Engineering Certificate <i>Capilano University</i> 4.28 GPA Dean's List	2021/09 – 2022/05 North Vancouver, Canada

Projects

Lunar Rover Ski Braking System Capstone Project <i>University of British Columbia, in collaboration with the Canadian Space Agency</i> Led a team of 5 Mechanical Engineering students to develop and build a ski braking system for the CSA's CRATER Lunar Rover.	2025/08 – 2026/04
Titan Endurance Project <i>UBC</i> - Led a team of 6 people to build a launcher and buggy system for MECH 223 project course with strict budget and schedule. - Used an Arduino with various sensors and actuators, as well as MATLAB simulations to optimize performance.	2023/01 – 2023/04
Atmospheric Monitoring <i>Capilano University</i> - Led a team to develop a wireless, drone mounted air quality monitoring system to monitor various air quality parameters and stream telemetry to ground receiver. - Responsible for designing and assembling structure, wiring electrical sensor system, and integrating wireless transceivers with an Arduino to send wireless data with <1% data loss.	2022/01 – 2022/05

Skills

Mechanical Design	Software	Project Management
- Machining 3D Printing - Waterjet, Laser Cutting - Composite Manufacturing - Engineering Drawings - DFM/DFA	- AutoCAD, Solidworks - FEA, CFD - Excel, VBA - PowerBI, Power Query - C, C#, C++, Python, MATLAB - ANSYS Fluent, ABAQUS - OpenFOAM	- Scheduling - Budget Estimating - Documentation - Technical Writing - HVAC & Plumbing Systems

Certificates

- BC Class 5 License - Reliability Status Security Clearance	- Solidworks CSWA - Basic Operations Drone License
